

#techmums Learn Shrimping

Join #techmums for a **FREE** fun day learning to Shrimp!

An introduction into the amazing world of electronics and programming

Sunday 8th June, 10am-4pm

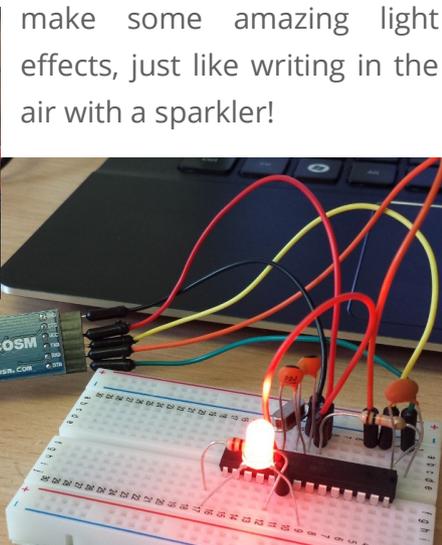

Ravensbourne College, North Greenwich

The Shrimp is a great fun, low cost computer that can be built and programmed by just about anyone, in only a few hours, and with no prior experience of electronics or programming. It is made up of a simple circuit that is assembled from a handful of components

This fun and free day will give you an introduction into the amazing world of electronics and programming and is suitable for mums of all ages and abilities.

Your children may soon be learning these computer skills at school, so this will help you to help them whilst having fun yourself!

During the day, you will learn what a Shrimp is, and what you can do with it. You will see how easy it is to build a basic Shrimp circuit, then you will write a simple program to make it flash a light. After that, you can add more lights and use the Shrimp to make some amazing light effects, just like writing in the air with a sparkler!

Just for mums!

Children aged 5-16 are very welcome!

Free and fun children's animation workshops will be provided on site by Ravensbourne

This workshop will be run for you by an expert team which includes #techmums trainers, and engineers from **Embecosm**, who are used to running Shrimping workshops for people aged from 9 to 90

Lunch is included!

Sign up for a whole day of family fun!

Sign up online:

[Event Registration](#)

Please let us know how many children you would like to bring, and their ages, along with any special dietary requirements you may have

You can bring your own laptop, or you can borrow one of ours; just let us know beforehand

Please email us at neil@neilcford.co.uk if you have any questions

Hosted by #techmums in partnership with:

Ravensbourne College, Greenwich Peninsula, London, SE10 0EW (opposite The O2)

Nearest tube station: North Greenwich (Jubilee Line)
